Data Recovery & Backups

Quiz • 50 min

Go to next item

1. The unthinkable happens, crippling your network. You implement your disaster plan, but it doesn't go smoothly. You decide to investigate. What is a common term in the IT community for this investigation?

Due Jun 25, 11:59 PM +08

Attempts 3 every 24 hours

1 / 1 point

Try again

- ☐ Recovery inspection probe
- ☐ Post-disaster inquiry
- ☒ After-outage analysis
- ☐ Post-mortem

Correct

Like

Dislike

Report an issue

2. A data backup strategy needs to prioritize important data and only back up what is necessary for operations. Assuming storage limitations, which of these is LEAST important to back up?

1 / 1 point

- ☐ Databases
- ☒ User downloads
- ☐ Emails
- ☐ Financial spreadsheets

Correct

3. Which of these are common backup tools you might consider when designing a backup solution? Select all that apply.

1 / 1 point

- ☐ Regedit
- ☒ Backup and Restore
- ☒ Time Machine
- ☒ Rsync

Correct

Correct

Correct

4. Common concerns with backups are disk failure, lack of redundancy, and increasing disk capacity. Which backup method addresses these concerns?

1 / 1 point

- ☐ Complete backup
- ☐ Incremental backup
- ☐ Differential backups
- ☒ RAID array

Correct

5. Which backup type only backs up files that have changed since the last run?

1 / 1 point

- ☒ Differential backup
- ☐ Full backup
- ☐ Partial backup
- ☐ Incremental backup

Correct

6. Which of the following are advantages of cloud storage services? Select all that apply.

1 / 1 point

- ☒ They make it easy for users to configure what files or folders they want to backup.
- ☒ Users can sync and backup files across platforms and devices.
- ☒ User backups don't require complicated scheduling.
- ☐ They allow everyone to access a person's files

Correct

Correct

Correct

7. What are the goals of a disaster recovery plan? Select all that apply.

1 / 1 point

- ☐ To predict disasters before they happen
- ☒ To prevent disasters from impacting operations
- ☒ To keep system downtimes to a minimum
- ☒ To prevent significant data loss

Correct

Correct

Correct

8. You are performing a network risk assessment to develop your disaster recovery plan. Which of these are examples of preventative measures? Select all that apply.

1 / 1 point

- ☒ Regular, automated backups
- ☐ Alert system for outages
- ☒ Operational documentation
- ☒ Redundancy solutions

Correct

Correct

Correct

9. When are post-mortem reports usually created? Select all that apply.

1 / 1 point

- ☐ When finance asks IT to justify the cost of its preventative systems
- ☒ At the end of a project
- ☐ To punish mistakes
- ☒ When something goes wrong

Correct

Correct

10. Which of the following are components of a post-mortem report? Select all that apply.

1 / 1 point

- ☐ All log data
- ☒ A detailed timeline of key events
- ☒ An explanation of resolution and recovery efforts
- ☒ A brief summary

Correct

Correct

Correct
