Data Recovery & Backups

Go to next item

1. When designing a continuity plan, what's the first thing to figure out?

- Due Jun 25, 11:59 PM +08 Attempts 3 every 24 hours

○ Future growth in data storage needs

○ How much total data you currently have

☒ What data you receive & backup

○ Encryption bandwidth requirements

✔ Correct

Like Dislike Report an issue

2. What are advantages of on-site backups? Select all that apply.

- ☐ B: Data is safe in case of disaster

☐ Data is more secure because of less outbound traffic

☐ D: There is less bandwidth usage

☒ There is quicker data access

✔ Correct

You didn't select all the correct answers

3. What's the optimal recommended backup storage strategy?

- ☐ Tape backups

☐ On-site backups

☐ Off-site backups

☒ A combination of on-site and off-site backups

✔ Correct

4. Which of the following are key parts of the disaster recovery testing process? Select all that apply.

- ☐ Update all software

☒ Document restoration procedures

✔ Correct

- ☒ Run simulations of disaster events

✔ Correct

- ☐ Replace old hardware

5. Which backup method saves copies of all important files and data at each backup?

- ☐ Incremental backup

☒ Complete backup

☐ Differential backups

☐ RAID array

✔ Correct

6. Which of the following are advantages of cloud storage services? Select all that apply.

- ☐ They allow everyone to access a person's files

☒ They make it easy for users to configure what files or folders they want to backup.

✔ Correct

- ☒ User backups don't require complicated scheduling.

✔ Correct

- ☒ Users can sync and backup files across platforms and devices.

✔ Correct

7. Which element of the disaster recovery plan is designed to proactively minimize the impact of a disaster?

- ☐ Detection measures

☐ Corrective or recovery measures

☒ Preventative measures

☐ Disciplinary measures

✔ Correct

8. You are performing a network risk assessment to develop your disaster recovery plan. Which of these are examples of detection measures? Select all that apply.

- ☒ Using an alert system for outages

✔ Correct

- ☒ Monitoring system testing

✔ Correct

- ☐ Testing knowledge and readiness for disaster

☐ Conducting regular, automated backups

You didn't select all the correct answers

9. When are post-mortem reports usually created? Select all that apply.

- ☐ To punish mistakes

☐ When finance asks IT to justify the cost of its preventative systems

☒ At the end of a project

✔ Correct

- ☒ When something goes wrong

✔ Correct

10. Why is it important for post-incident analysis to highlight things that went well?

- ☐ It minimizes the importance of what went wrong.

☐ It improves team morale.

☒ It helps demonstrate the effectiveness of systems in place.

☐ It's a way to get more money for preventative systems.

✔ Correct
